Using KCER (Kidney Community Emergency Response) as a Resource

Dialysis and kidney transplant patients must take special precautions to ensure their health and safety during emergencies and disasters. Join us to learn from Beverly Whittet and Peter Traub, of the Kidney Community Emergency Response Coalition, about:

• KCER’s online platform
• Ways to plan ahead to ensure dialysis services are available in emergency or disaster situations
• The tools and resources available to patients with kidney failure and dialysis facilities relating to emergency preparedness.

Tuesday, September 20, 2016
