Health disparities in kidney failure

KIDNEY FAILURE HAS A DISPROPORTIONATE IMPACT ON PEOPLE OF COLOR. COMPARED TO WHITE AMERICANS, THE LIKELIHOOD OF DEVELOPING KIDNEY FAILURE IS:

3.4×

greater for Black Americans

1.9×

greater for American Indians

1.3×

greater for Asian Americans

1.5×

greater for people of Hispanic/Latino ethnicity
than people of non-Hispanic/Latino ethnicity.

THE AMERICAN KIDNEY FUND (AKF) PROVIDES FINANCIAL ASSISTANCE TO:

1 out of 17

White Americans
with kidney failure

1 out of 10

Black Americans
with kidney failure

1 out of 10

Hispanic/Latino Americans
with kidney failure

Why people with kidney failure need financial assistance from AKF:

Kidney failure is a disability. Dialysis is life support. Treating kidney failure and its comorbidities is more consuming than a full-time job: more than **80%** of people on dialysis cannot work.

250

Nebraskans on dialysis and living with transplants received grants from AKF in 2021 to pay for their insurance premiums and other health care-related costs not covered by insurance.

\$850,893

in charitable assistance from AKF ensured that low-income Nebraska dialysis and transplant patients could afford their lifesaving health care in 2021.

**INSURANCE
BREAKDOWN OF
AMERICANS WHO
RECEIVED CHARITABLE
PREMIUM ASSISTANCE
FROM AKF IN 2021**

Medicare Part B: **36.8%**
Medigap: **31.1%**
Employer group health plans
(including COBRA): **18.9%**
Commercial plans: **10.5%**

Exchange: **3.4%**
Annuity: **1.5%**
Medicare Advantage: **1.2%**
Medicaid (in states that
charge premiums): **0.1%**
